

EXAM

(4.0 Hours - Other)

Title: Pesticides and Adjuvants,

Course # A-0333-08

Name: _____, License # _____, License Type: _____

Address: _____, City _____, State _____, ZIP _____

E-mail: _____, Phone # _____

Instructions: Please **print** this exam; answer each question, and mail it, along with a **\$25.00** processing fee to:

PCACCA

2743 East Read Lane

Preston, ID 83263

Please Check this Box if you paid by PAYPAL

For Official Use Only

Date Received _____

Mailed to CECPM _____

TEST SCORE _____

Once the exam is received, it will be corrected and mailed back to you along with confirmation of the completed hours. We will also mail certification of the completed hours to the appropriate organization for their records.

Would you like to be notified of any special offers from our sponsors? YES NO

1. A pesticide is any substance or mixture intended for pest poisoning.
 - a. True
 - b. False
2. When making a pesticide use decision, suppression indicators include?
 - a. Inoculum sources
 - b. Favorable conditions for development
 - c. Historical disease infection
 - d. All of the above
3. Contacting a farm advisor or Ag commissioner is a good idea when trying to select the right pesticide.
 - a. True
 - b. False
4. Cost of product does equal the product's efficacy?
 - a. True
 - b. False
5. Weather conditions can affect pesticide efficacy?
 - a. True
 - b. False
6. When selecting the proper pesticide what factors should one consider?
 - a. Ease of use and compatibility
 - b. Effects on beneficials
 - c. Harvest limitations
 - d. All of the above
7. Proper equipment operation, preventing gaps and overlaps and types of formulations used are all what?
 - a. Common sense
 - b. Important application techniques
 - c. Easy to do
 - d. A waste of time to worry about
8. Keeping a pesticide on-target is determined by what factors?
 - a. Skill of operator
 - b. Droplet size of spray
 - c. Weather conditions
 - d. All of the above
9. LD₅₀ means what?
 - a. Lethal Concentration
 - b. Lethal damage
 - c. Lethal dose
 - d. Lethal drugs
10. The dose that kills 50% of a test population is represented as?
 - a. LC₅₀
 - b. LR₅₀
 - c. LD₅₀
 - d. 50 LD
11. Toxicity classification with a "Danger" is what category?
 - a. 1
 - b. 2
 - c. 3
 - d. 4

12. Toxicity classification with a “Warning” is what category?
- 1
 - 2
 - 3
 - 4
13. Toxicity Classification with a “Caution” is what category?
- 1
 - 2
 - 3
 - 4
14. An acaricide is supposed to control what?
- Algae
 - Animals
 - Cars
 - Mites
15. A Molluscicide is supposed to control what?
- Plants
 - Mollusks
 - Snails
 - Both B and C
16. A silvicide is supposed to control what?
- Silver
 - Trees
 - White flies
 - Fish
17. An anticoagulant is used to control rodents causing death by preventing normal blood clotting.
- True
 - False
18. Microbials are chemicals that consist of bacteria, fungi, or viruses used to control weeds, and invertebrates.
- True
 - False
19. There are factors that influence the reactions to pesticides what are they?
- Mode of action
 - Life stage of pest
 - Pesticide uptake
 - All of the above
20. Water-Soluble Solutions (S) are liquid formulations that dissolve in water to form a true solution.
- True
 - False
21. Water-Soluble packets reduce the risks of mixing and handling.
- True
 - False
22. When adding formulations together they should be combined in the following order, 1-Wettable powders, 2-Flowables, 3-Water-soluble concentrates and finally emulsifiable concentrates.
- True
 - False
23. An adjuvant is a material added to a pesticide mixture to improve or alter the deposition, toxic effect, mixing ability, persistence, or other beneficial qualities of the active ingredient.
- True
 - False
24. A surfactant is used to improve the ability of a pesticide to stick to and be absorbed by the target surface.
- True
 - False
25. A buffer lowers the pH of a spray solution or it can help maintain the pH within a narrow range.
- True
 - False
26. Dyes you add to a spray mix to be able to see areas already sprayed are known as?
- Food coloring
 - Spray colorants
 - Chemical dyes
 - None of the above
27. Deposition aids improve the ability of a pesticide spray to reach its target.
- True
 - False
